Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 14 recites the limitation "'said shaft" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Odom (US Patent No. 4,665,565).

With regards to claims 1 and 2, Odom shows a first attachment feature (portion of fastener 46 that is positioned on the thumb area) on a glove surface area above the thumb (see Fig. 5). And with respect to the second attachment feature, column 1, lines 37-45 indicate that there are pair of gloves that are mirror images of each other.

Art Unit: 3711

Therefore the second glove that is not illustrated in Figs. 5 and 6 has a second attachment feature (46).

With regards to claim 3, Odom shows a first location feature on the first glove (46) above the palm surface (referring to Fig. 5 the area above the palm is considered a first location).

With regards to claim 4, part of Odom's attachment element (46) that is located on the index finger is considered as a third attachment feature.

With regards to claim 5, part of Odom's attachment element (46) that is located on the little finger is considered as a fourth attachment feature.

With regards to claim 6, the different attachment areas (46) are capable of performing the claimed function in this claim.

With regards to claims 7 and 8, Odom discloses attachment features consisting a hook and loop attachment system (see column 1, lines 45-50).

With regards to claim 9, Odom discloses a golf club having a fifth attachment feature (44).

With regards to claims 10-22, they are directed to the obvious method steps of using the Odom's device.
